How InfoLock works

- Data is collected from multiple disparate sources.
- InfoLock transforms and enriches data to make it meaningful.
- Lockton’s skilled experts use the results to develop targeted solutions for your business.

**TURNING DATA INTO FOCUSED SOLUTIONS**

**STEP 1**
Determine what’s driving trends.

**STEP 2**
Assess how population accesses and uses healthcare services.

**STEP 3**
Identify sickest patients; determine how to design the best program.

**STEP 4**
Identify care gaps that, when closed, could lead to fewer emergency room visits and inpatient admissions.

**STEP 5**
Together with you, consider your business objectives and design a comprehensive plan involving both population-level and individual-level health management solutions.

**STEP 6**
Measure and adjust, as needed.

**STEP 7**

Contact your Lockton team to find out how InfoLock can harness data to improve employee health and well-being while meeting your business objectives.
